SCOPECANVAS.COM

Scope Canvas is free to use and distribute for personal and commercial uses, under the Creative Commons Attribution-ShareAlike 4.0 International license.

**We created Scope Canvas  
to align user needs and  
business goals when  
creating products, services  
or new business models.**

# What can Scope Canvas do for you

## **Aligned teams**

Vision, values and culture are defined in a shared, horizontal way and become explicit for everyone to see.

## **Better communication**

Stakeholders can introduce their priorities and goals from the very beginning.

## **Focus on the problem, not the solution**

Discussion centers on value proposal and knowledge about the problem rather than specific ideas.

**Scope Canvas doesn't tell  
you how to work.**

**It's a snapshot of what the  
team has learned so far.**

# How to start?

Print it big (A0 recommended)

Use sticky notes and sharpies

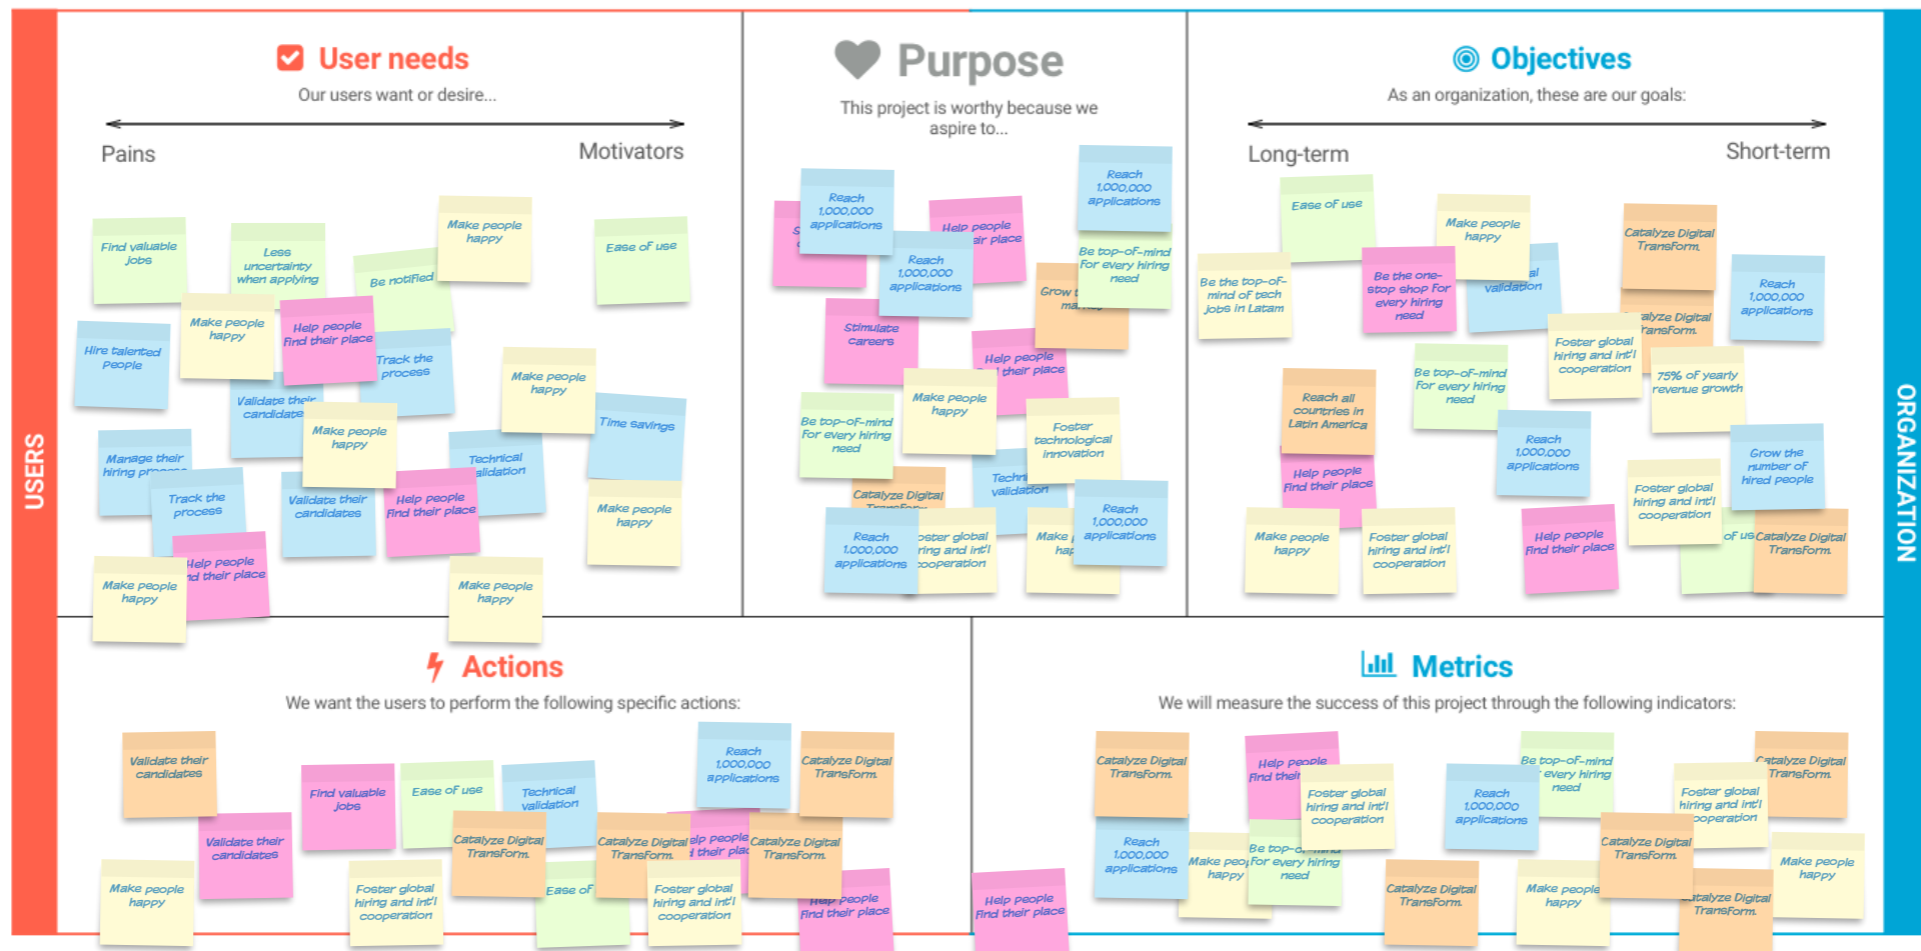

Keep it short and simple

Brainstorming mode: all ideas are valid

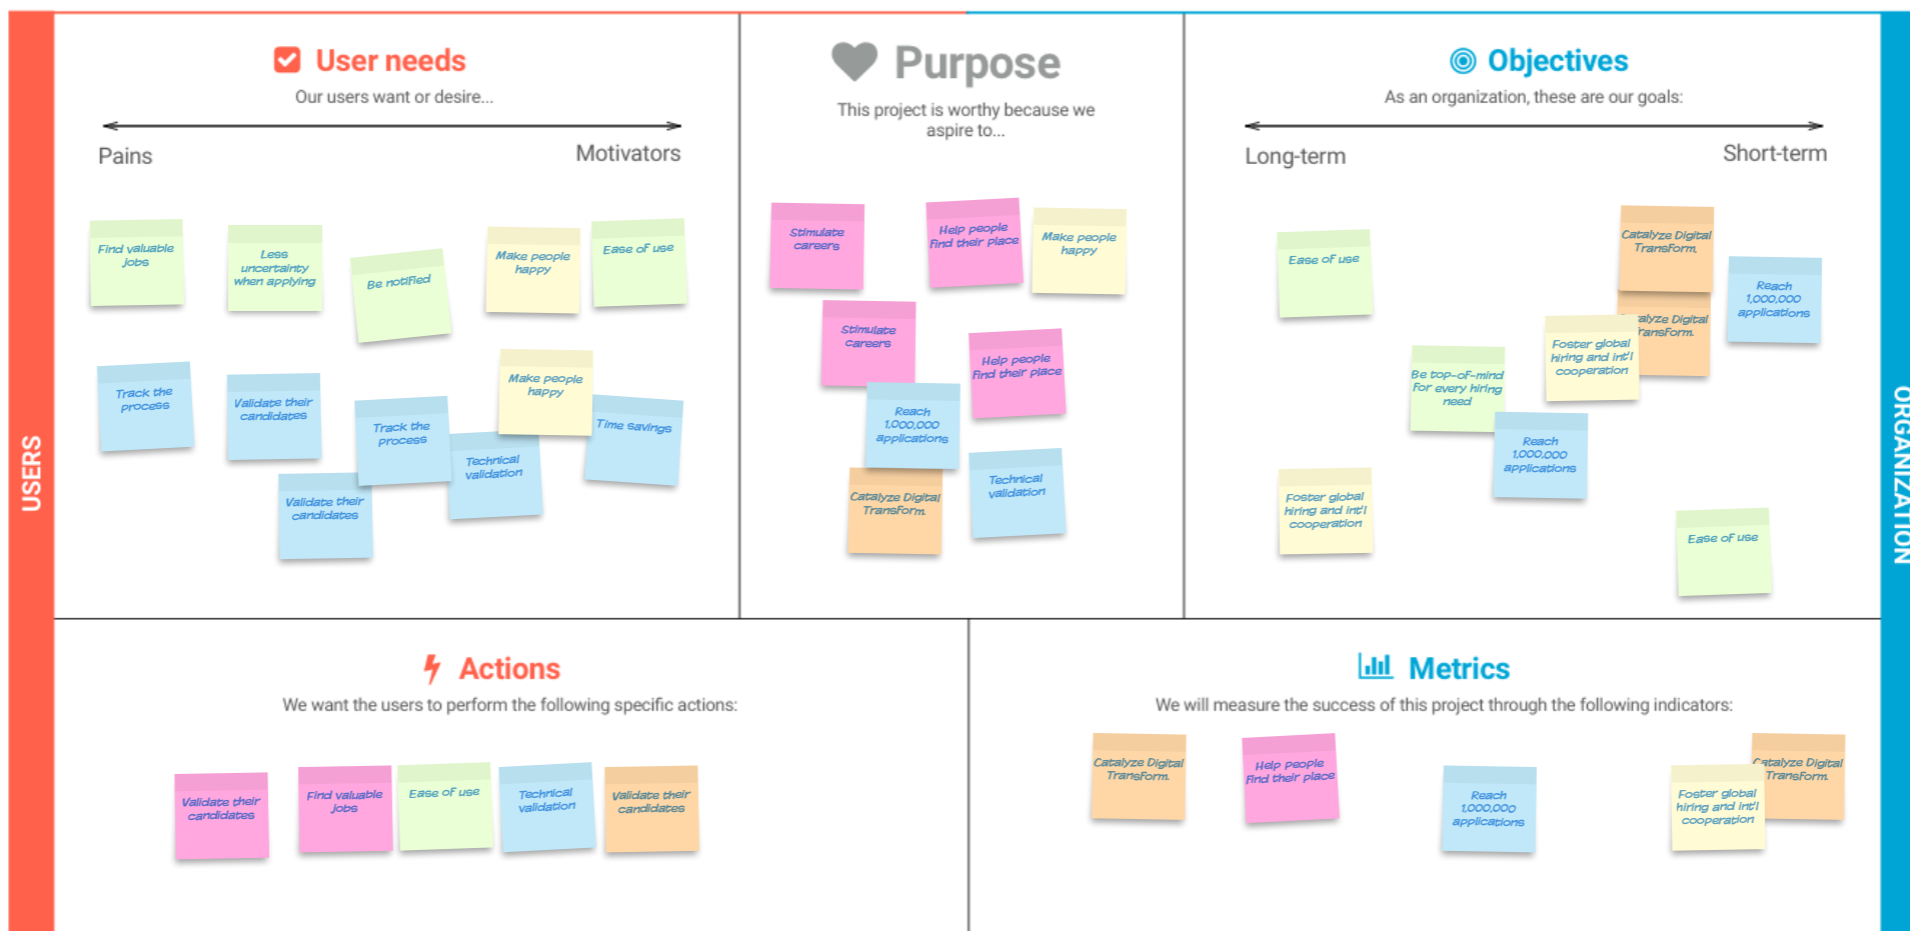

# After your first Scope Canvas session, it usually looks messy and filled with ideas...

Project: *Get on Board*

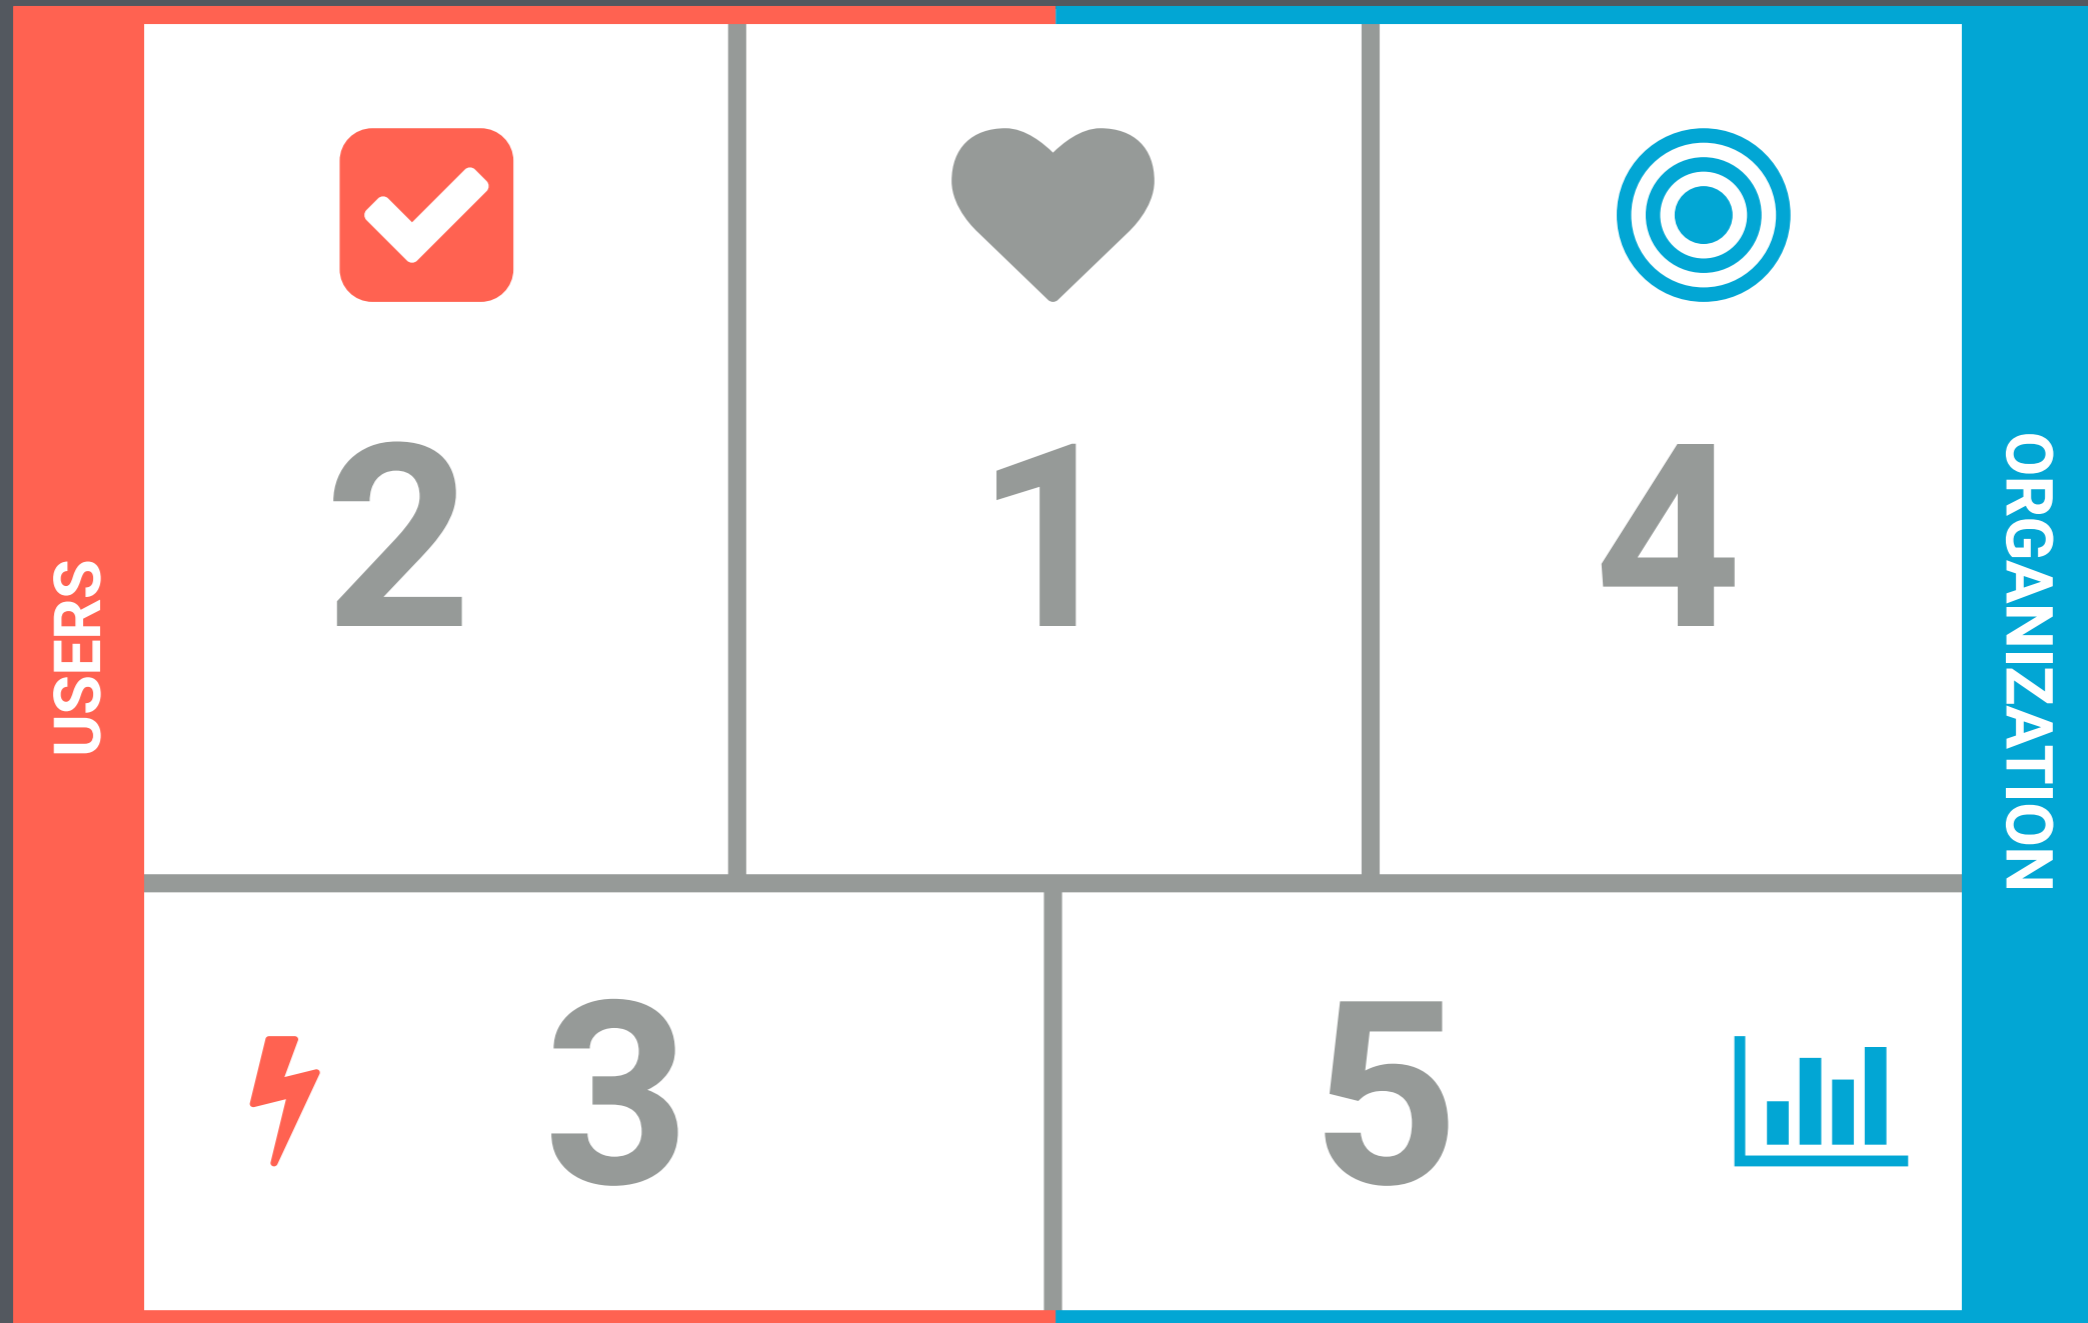

...but as the project moves forward, ideas and knowledge tend to converge and agreements emerge.

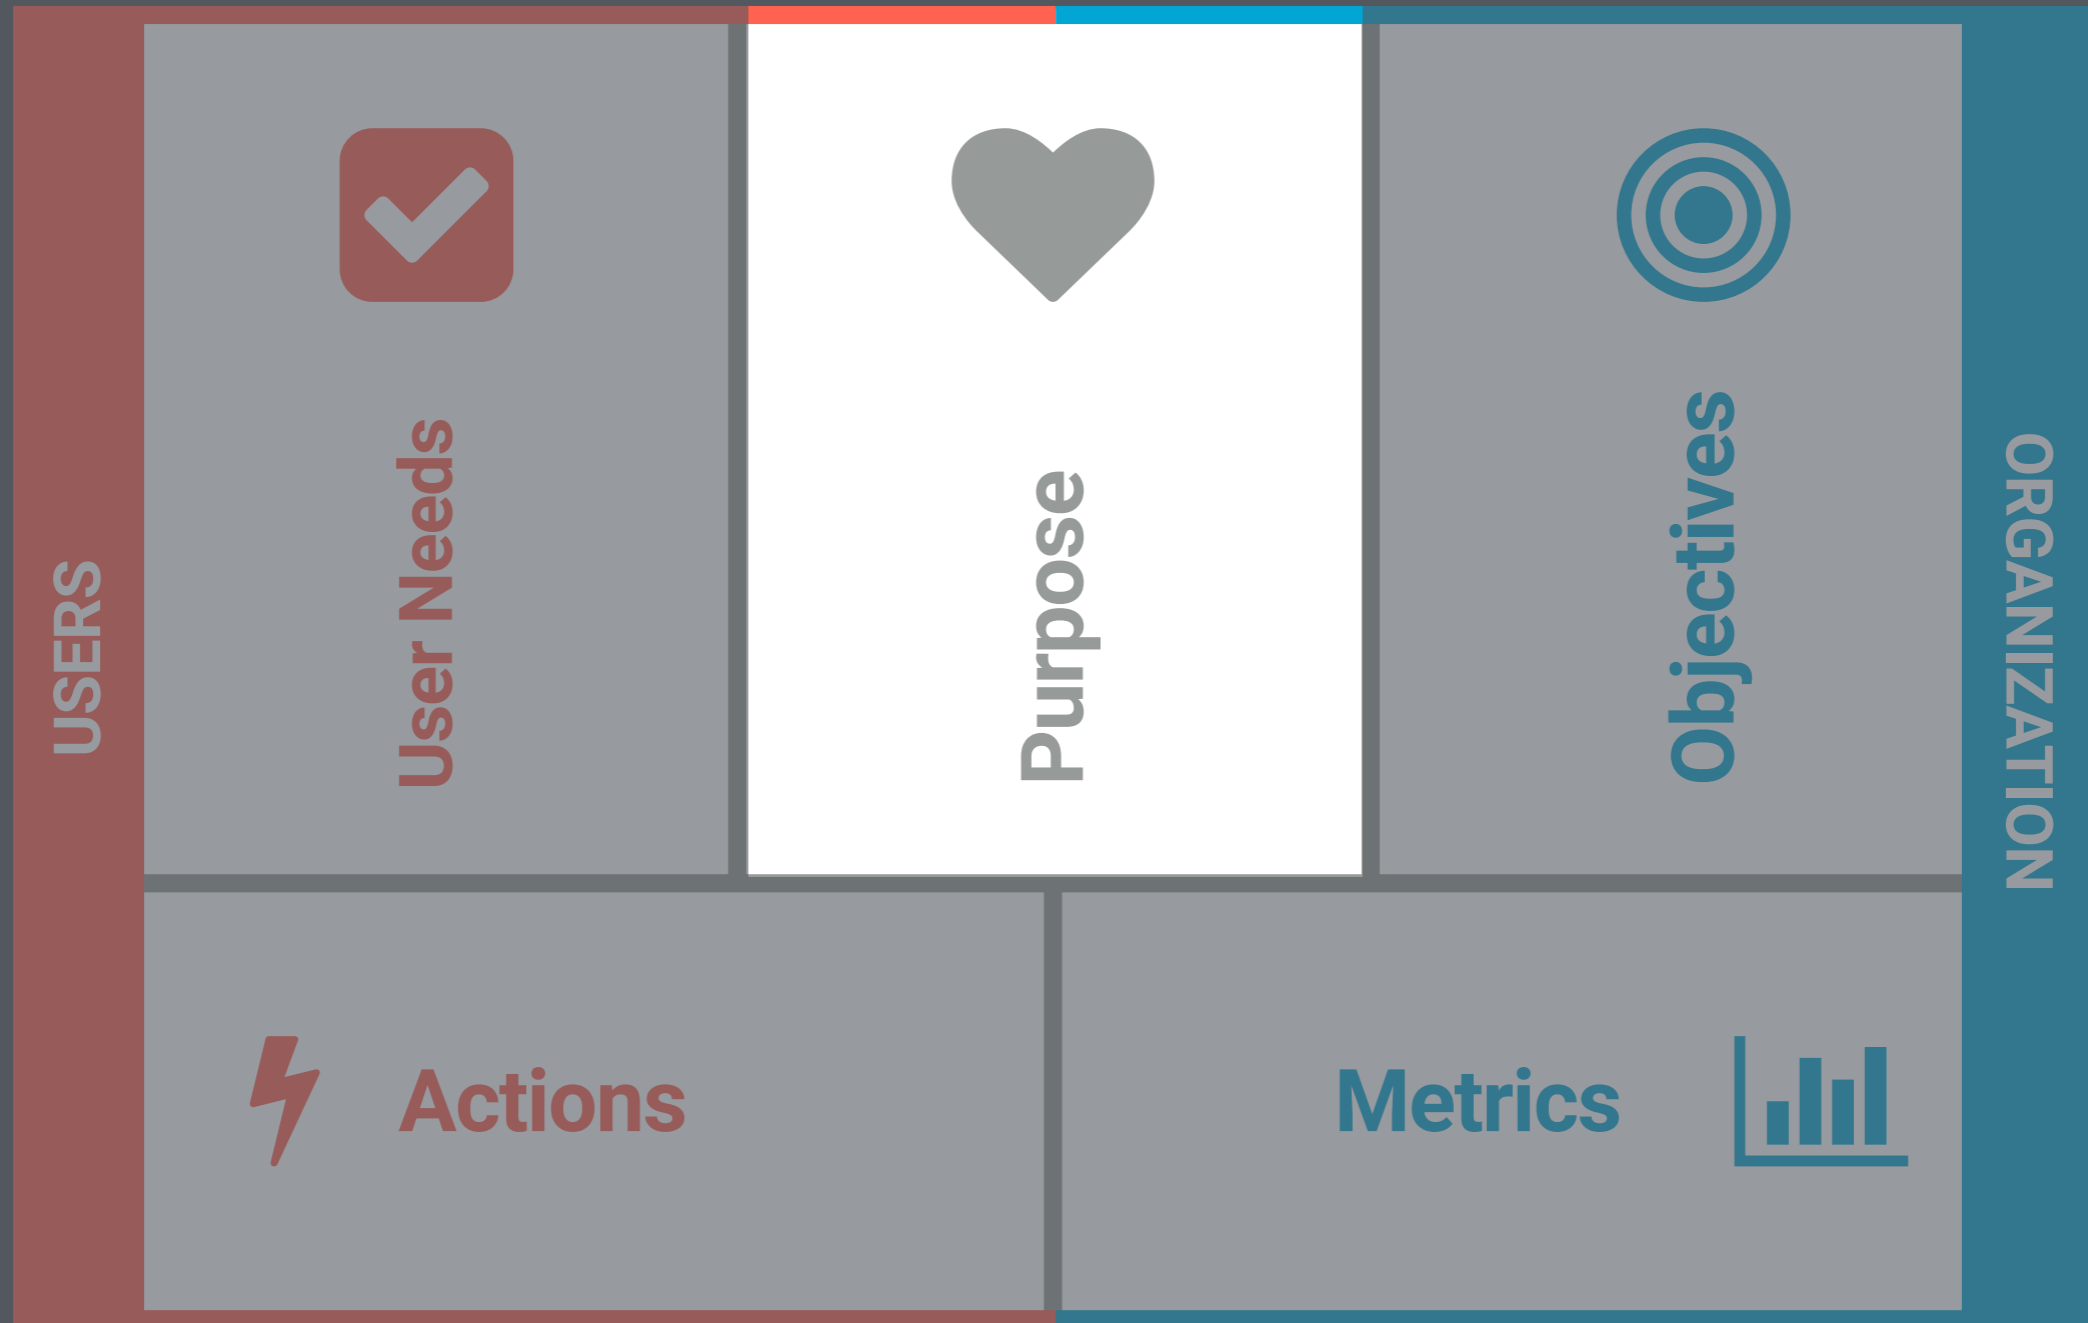

Project: *Get on Board*

**Suggested filling order**

# ♥ Purpose

What makes this worthy for us?

## Examples

*Make quality,  
healthy Food  
accessible to  
everyone*

*Connect people  
with their loved  
ones, no  
matter the  
distance*

*Promote a  
more  
respectful  
culture*

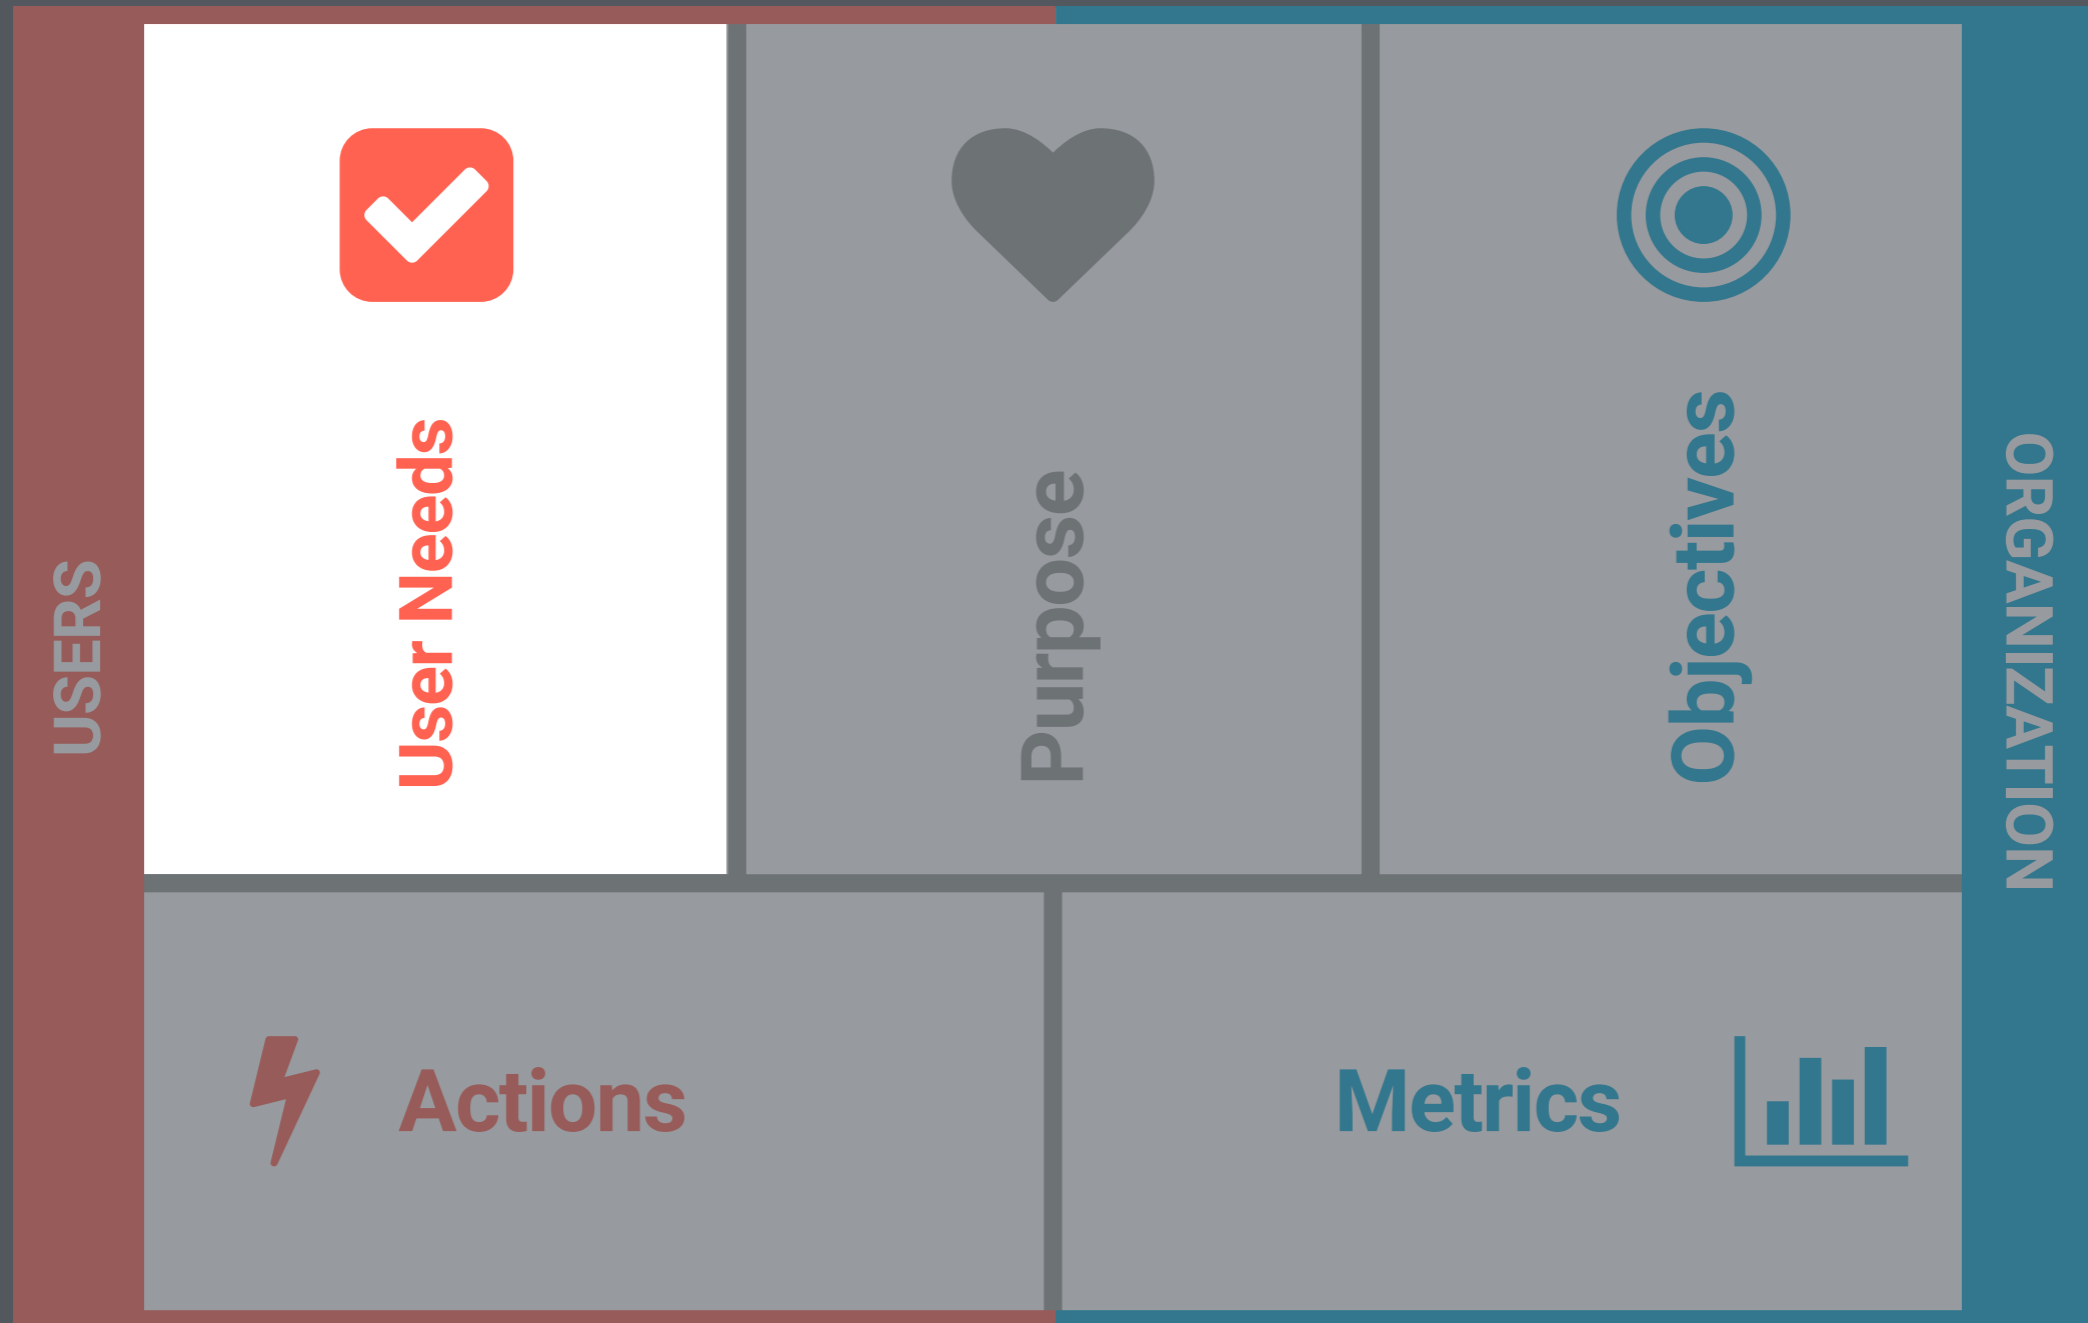

*Improve  
people's  
Financial  
welfare*

*Help people  
Find their ideal  
place*

# The purpose must:

- Reflect both the org's collective mission and the personal motivation of everyone in the team.
- Serve the org and its users equally.
- Be ambitious and action-oriented.

## **User needs**

What poorly met user needs do we have the potential to address?

User needs

# Examples

Pains

Motivators

*Protect my home from theft*

*Eliminate bureaucracy*

*Avoid losing time making lines*

*Amusement*

*Social status*

*Save energy*

*Financial stability*

# Pains

Needs that are clear and patent for users, expressed in terms of problems that need solving.

# Motivators

Benefits or things desirable enough to users as to motivate them into taking actions.

# Avoid confusing needs with (potential) solutions.

*Pay bills using our mobile app.*

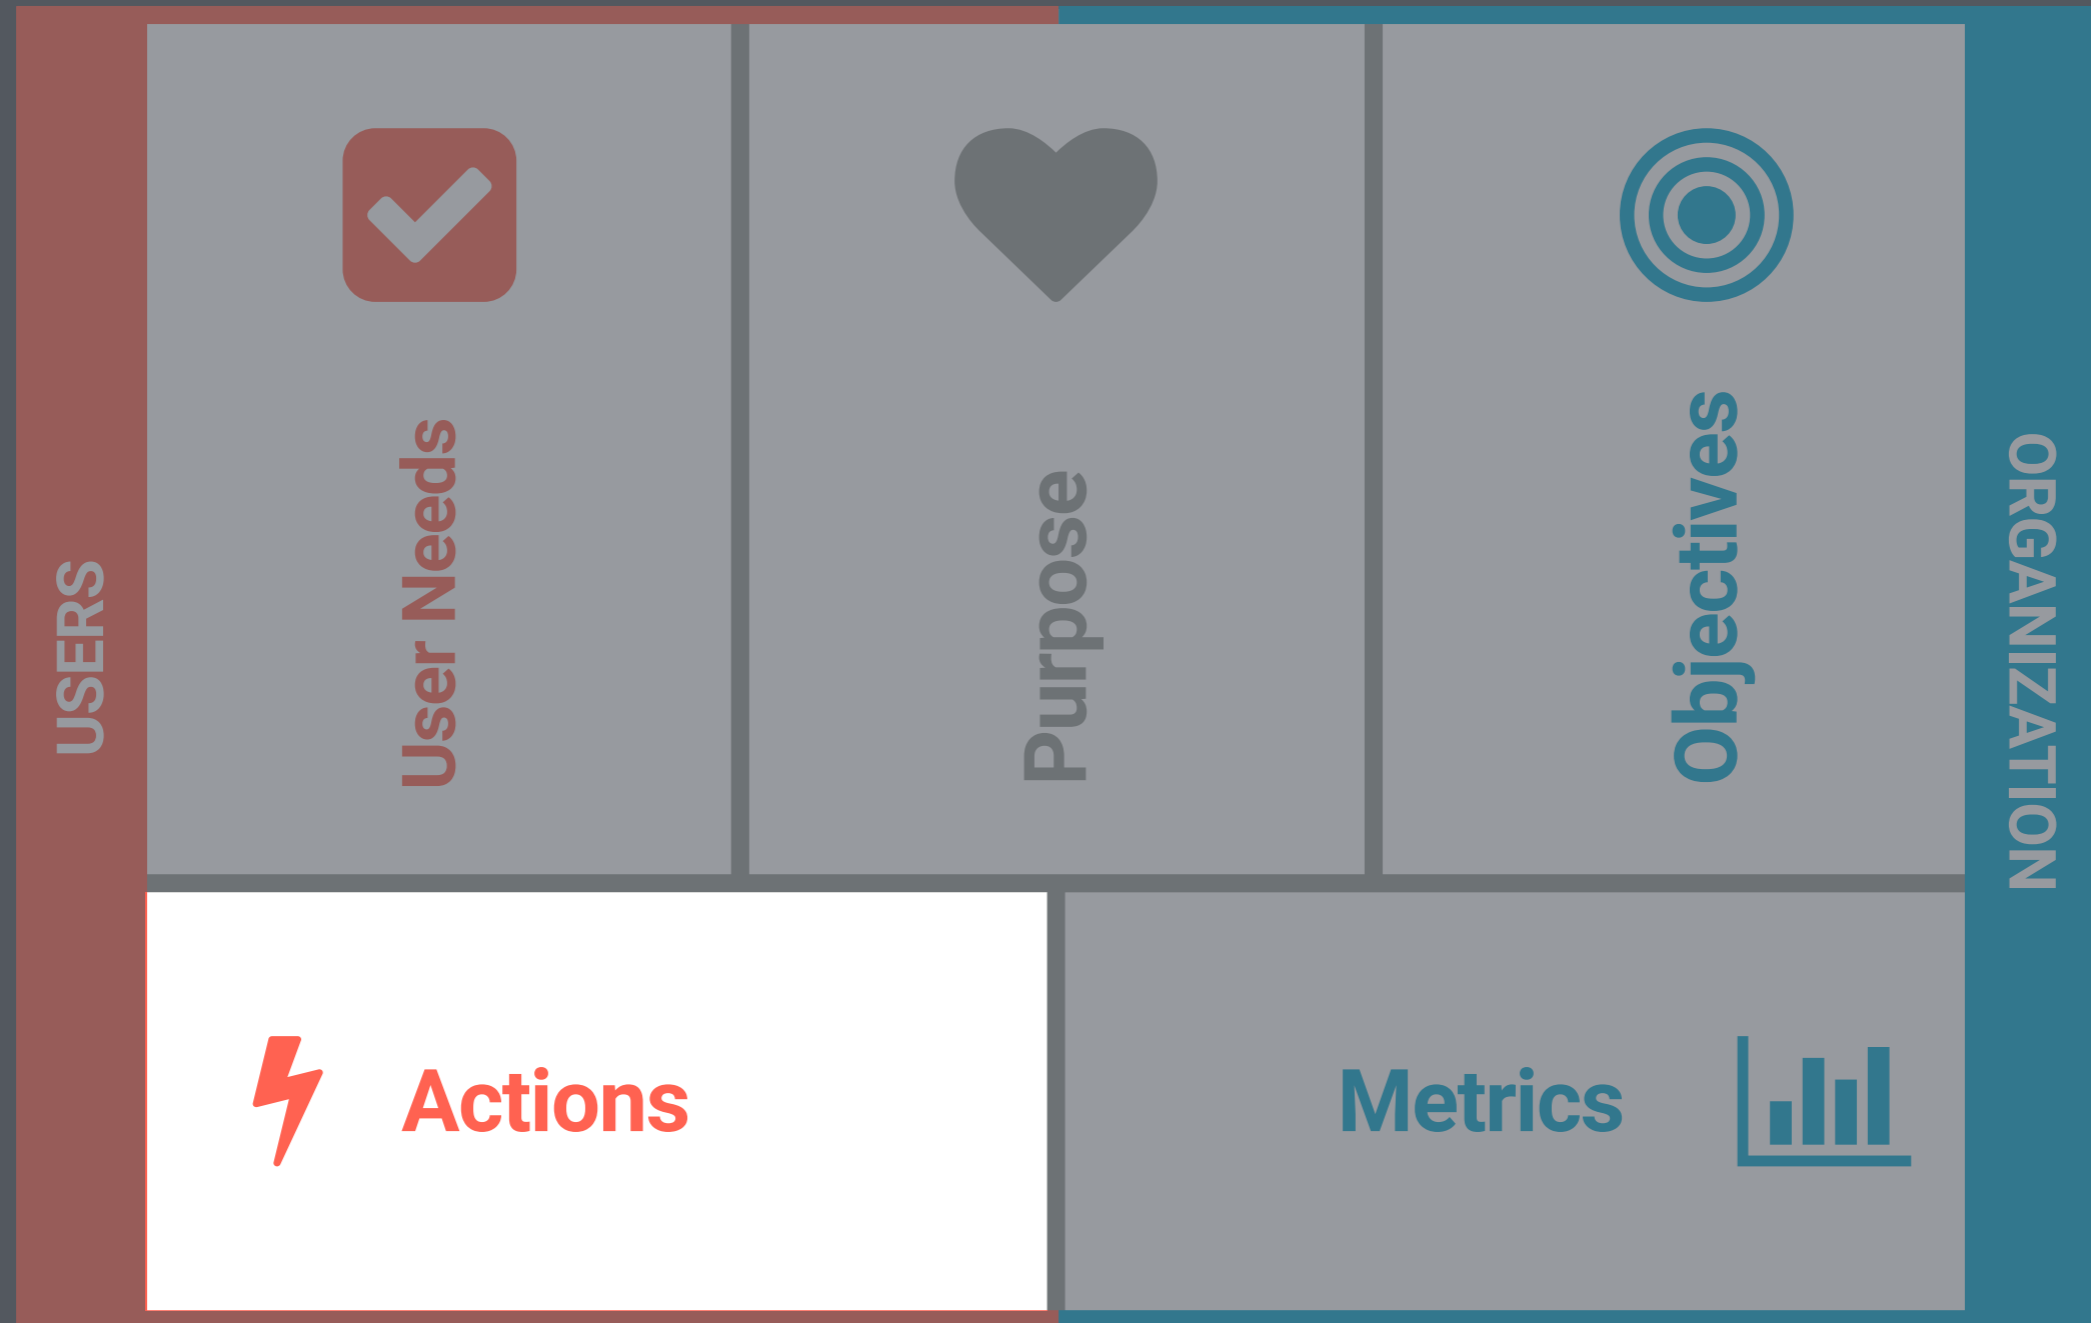

*Get medical advice using an app instead of calling a doctor.*

*Order Food using a tablet instead of waiting in line.*

# **Actions**

What do we expect the users to do? How do we understand conversion?

# Examples

*Buy*

*Commuting via  
bicycle instead  
of car*

*Order via  
mobile app*

*Add last-minute  
purchases to the  
shopping cart*

*Use the app in  
a daily basis*

## Actions

**Actions must be crucial  
for the project to gain  
traction.**

## ⚡ Actions

**Actions must be concrete and observable.**

*Improve their  
portfolio  
management*

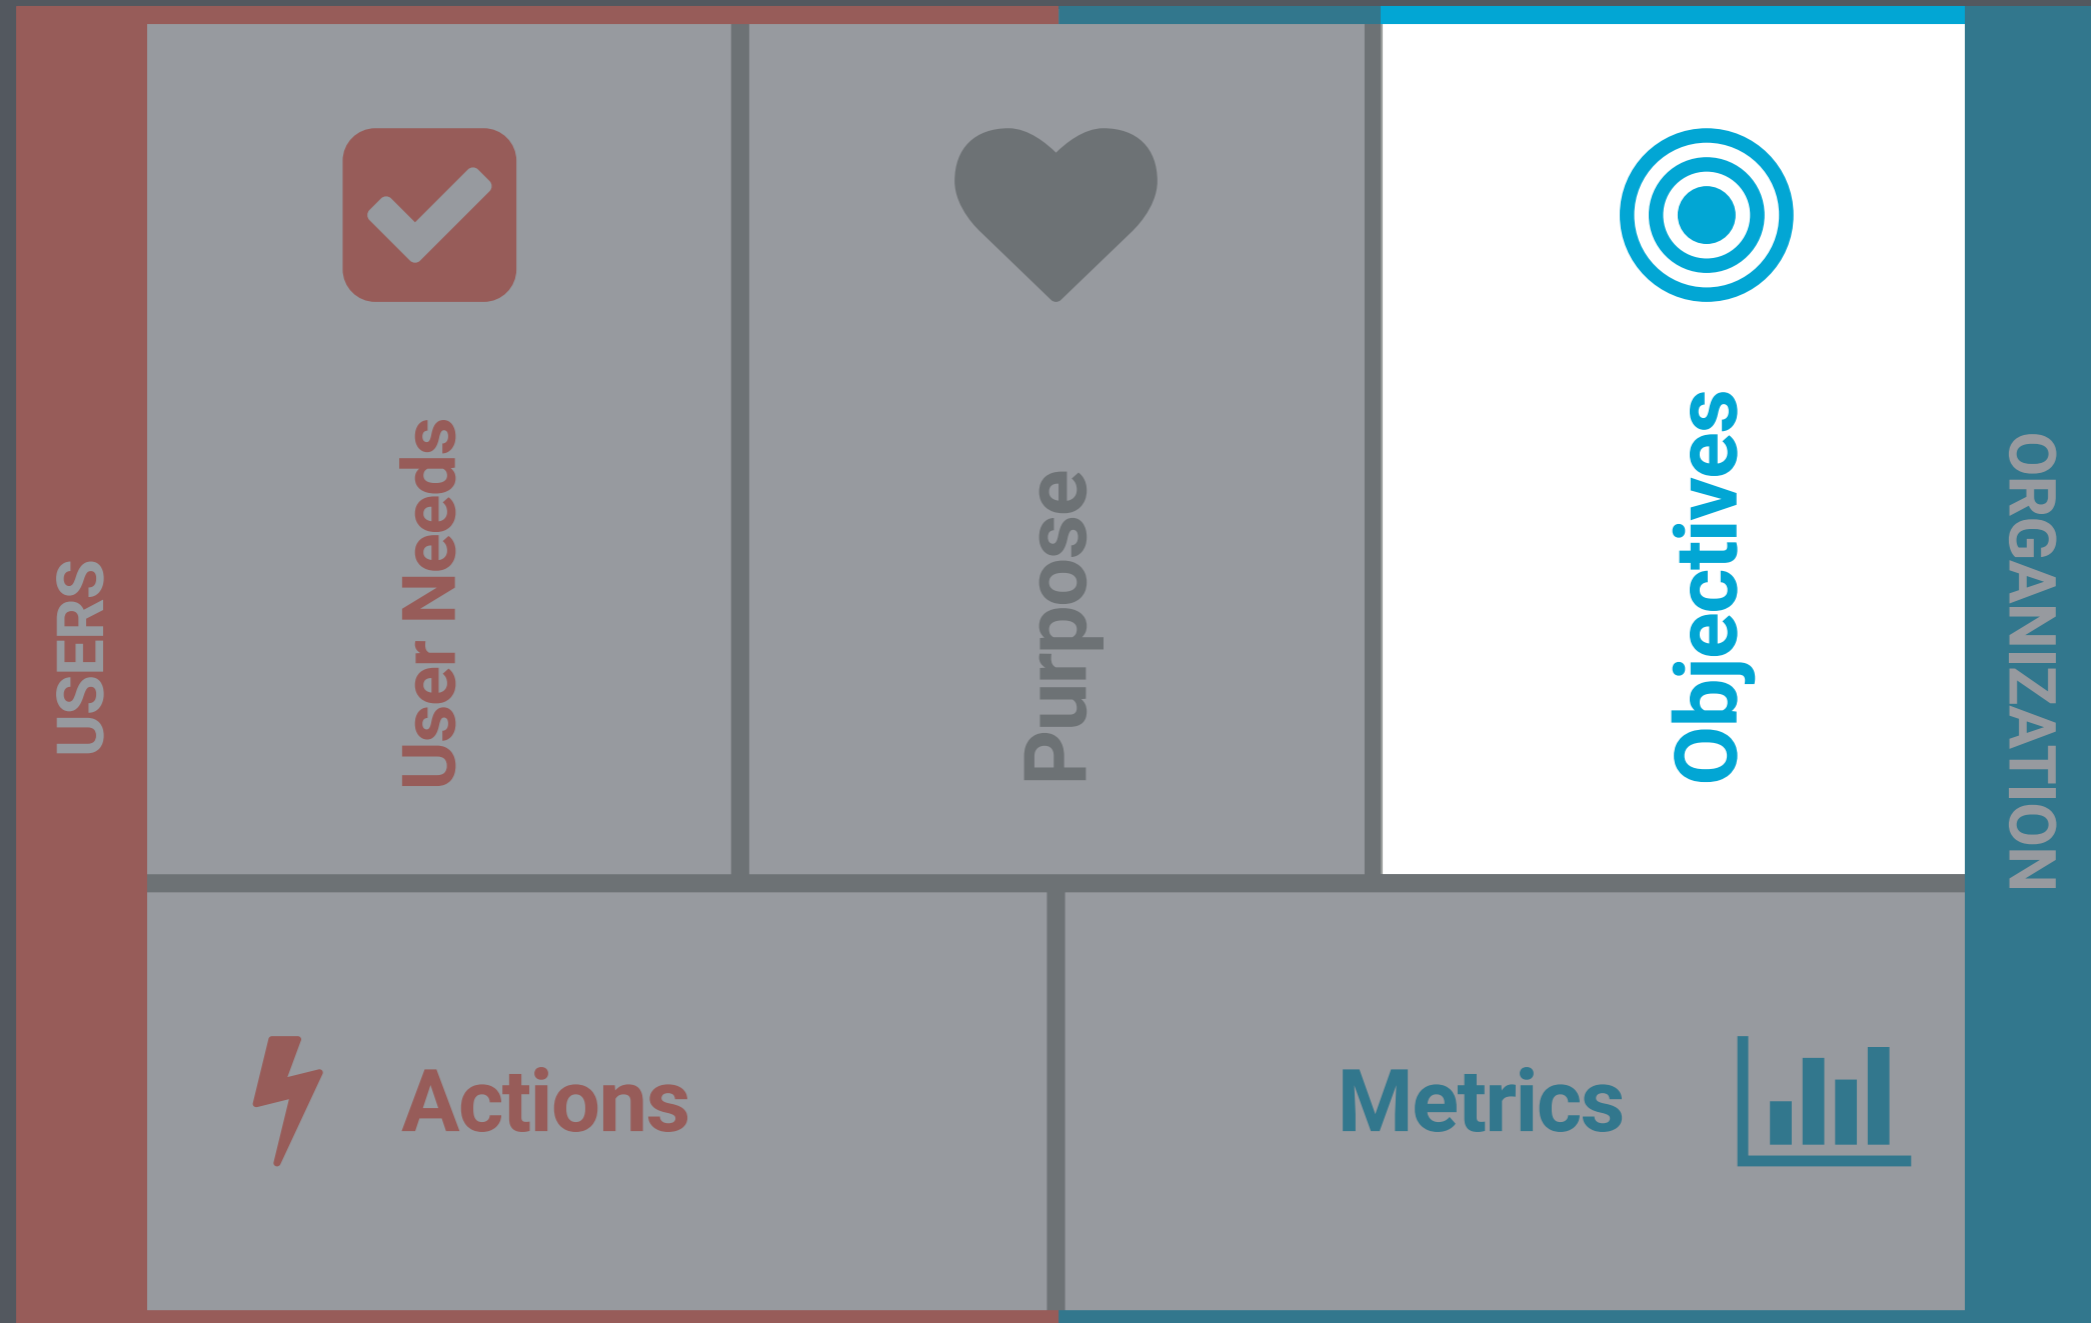

*Be in better  
shape*

*Understand the  
importance of  
saving energy*

# Business objectives

As an organization, what do we expect to get from this project?

# 🎯 Objectives

## Examples

Long term

Short term

*Improve  
reputation  
and  
positioning*

*Build a 100%  
digital  
customer  
relationship*

*Increase  
conversions*

*Decrease  
churn rate*

*Be the top-of-  
mind in our  
industry*

*Mejorar la  
experiencia en  
tiendas  
Físicas*

*Reduce  
purchase  
time*

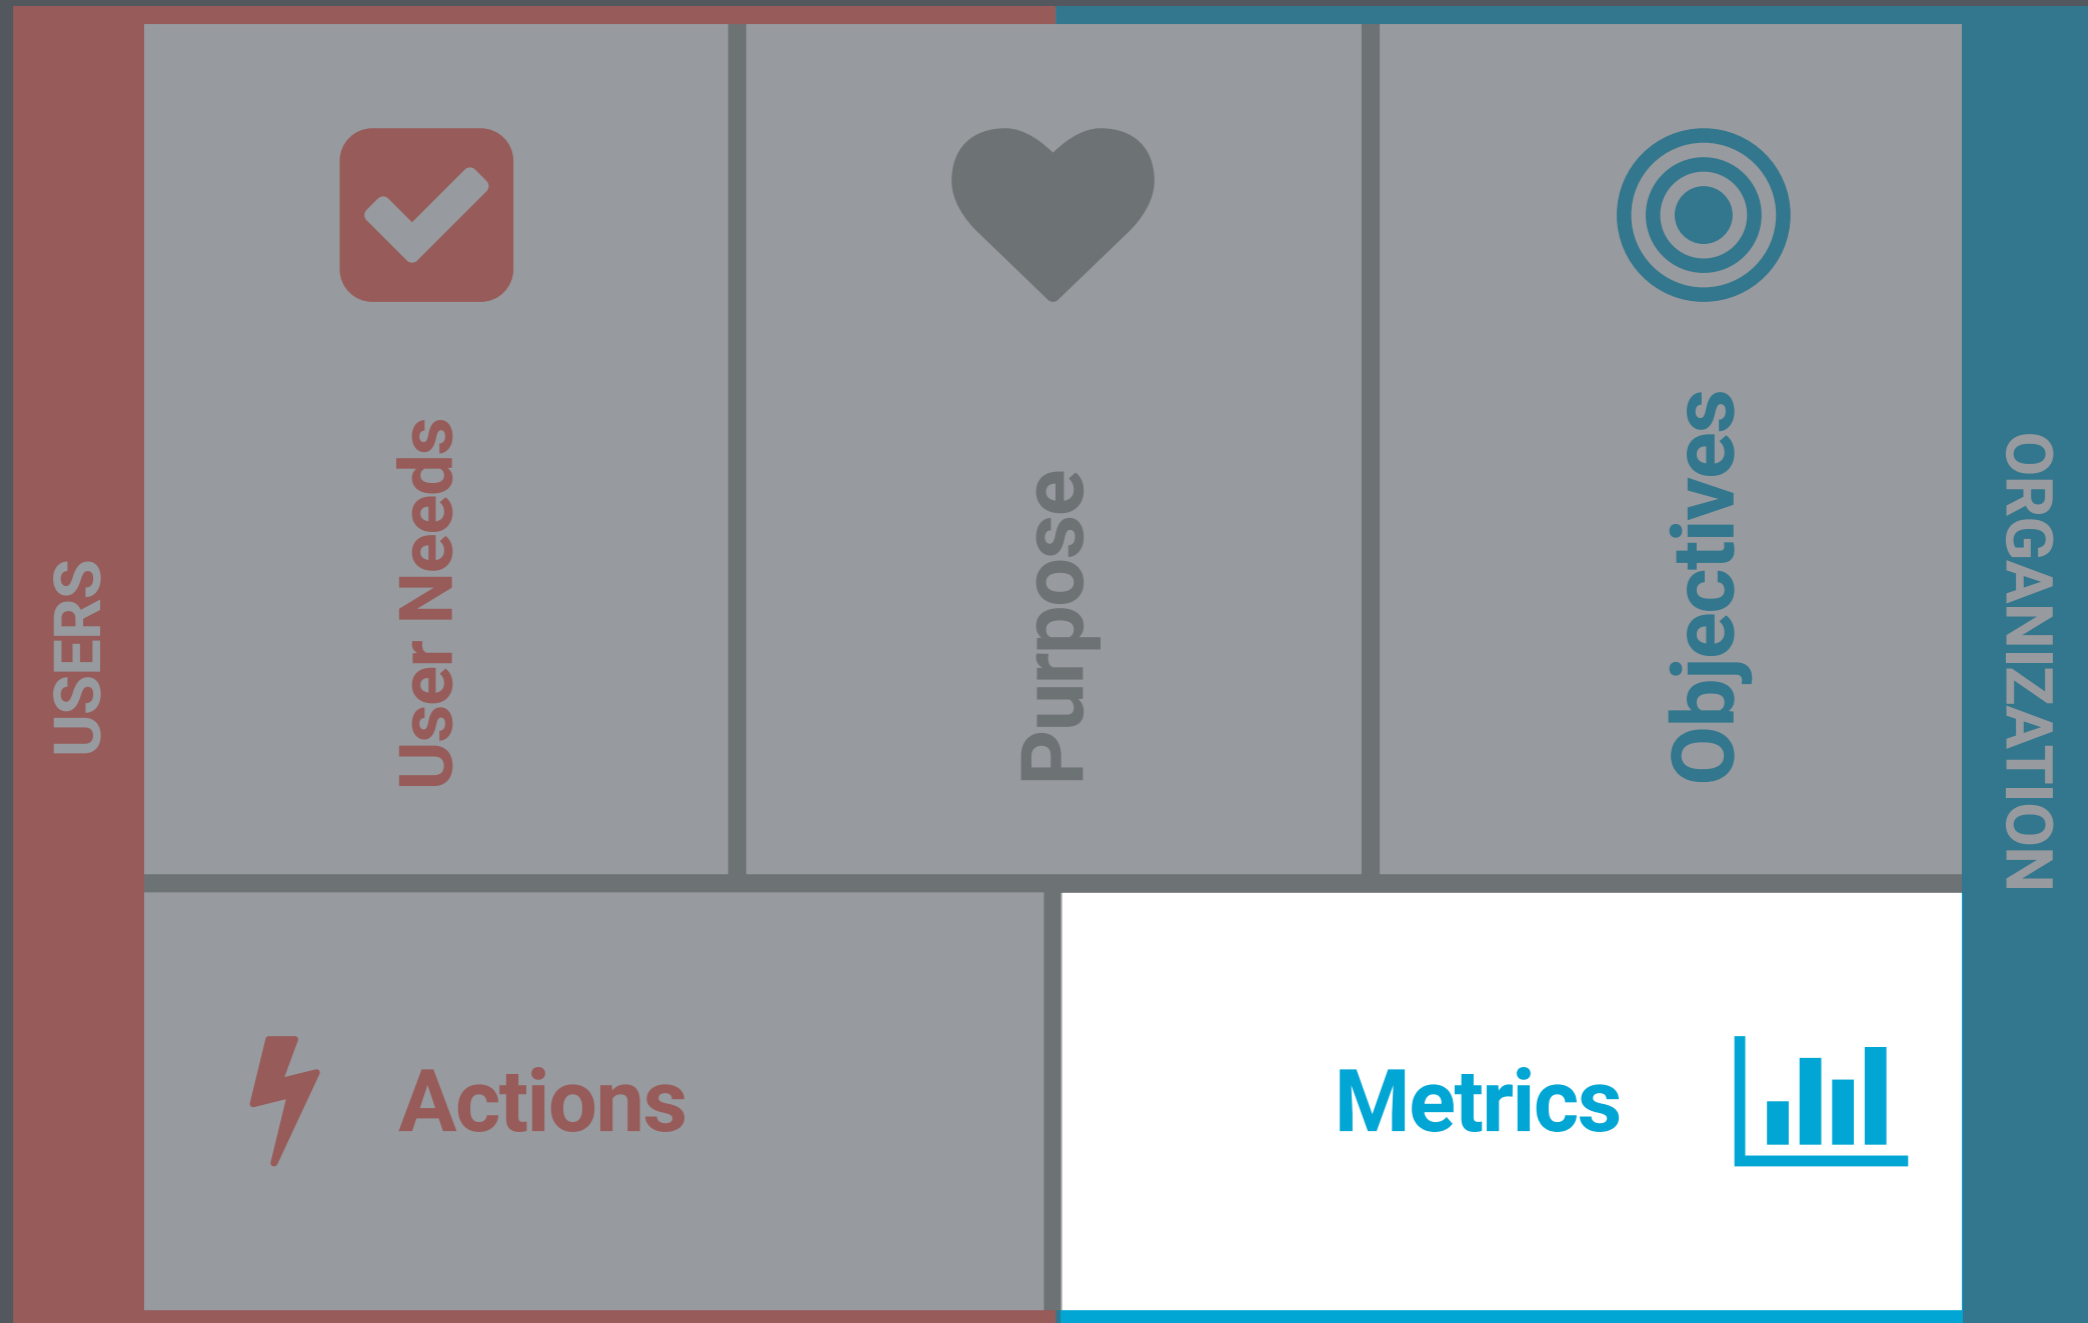

## 🎯 Objectives

### **Short term**

Immediate, quantifiable goals, that represent the expected direct return of investment of the project.

### **Long term**

Vision that reflects the project's potential, both for itself and for the org, if it turns out to be a success.

# Metrics

How will we measure that the goals are being met?

# Examples

*Average  
revenue per  
user*

*Task's time to  
completion*

*# of support  
tickets  
opened*

*Churn Rate*

*NPS*
